

Cable HT underground galvanised U-series

This underground cable is used to carry the electricity from the energizer to the electric fence in a safe and insulated manner. It can also be used to carry the electricity under gates to the next section of fence.

This underground cable is suitable for use with galvanised wires, aluminium wires and all poly wires, poly ropes and poly tapes.

Features

- Heavy duty design for harsh environments
- 1.6 mm diameter inner conductor wire for shorter cable runs
- 2.5 mm diameter inner conductor wire for longer cable runs and larger fences.

Specifications:

- Solid heavy galvanised inner wire conductor
- 1.6 mm wire (98 Ohms/km)
- 2.5 mm wire (36 Ohms/km)
- Double insulated UV stabilised outer and inner sheaths
